14. One of the following functions is not an input signal to control systems

إختر أحد الخيارات:

a. unit step

b. Unit ramp

c. damped exponential function

d. ramp function

21. Laplace transform of unit ramp function is

Select one:

- a. s^2
- b. s
- c. 1/s
- d. 1/s^2

Clear my choice

The output variable of the comparator is called

Select one:

- a. manipulated variable
- b. set point
- c. actuating error
- d. feedback signal

Clear my choice

In steam engine speed control system the feedback element is

Select one:

- a. gear box
- b. control valve
- c. power cylinder
- d. pilot valve

Clear my choice

feedback is an operation used to

Select one:

- a. reduce the difference between the actual output and some reference input
- b. to change the type of the output
- c. to maintain a constant output
- d. reduce the difference between the actual output and the desired output

Clear my choice

14. One of the following functions is not an input signal to control systems

Select one:

- a. Unit ramp
- b. unit step
- c. ramp function
- d. damped exponential function
