When we load program in S7-200 simulator , the window is open

Select one:

- a. In LAD and FBD
- b. In LAD and STL
- c. In FBD and STL
- d. In LAD

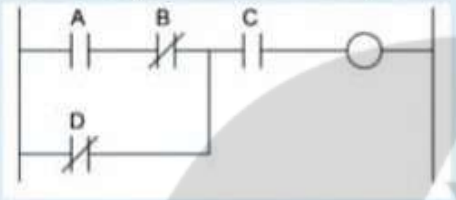

Question 3

Not yet answered

Marked out of 2.00

Flag question

The Boolean representation of this PLC program is:

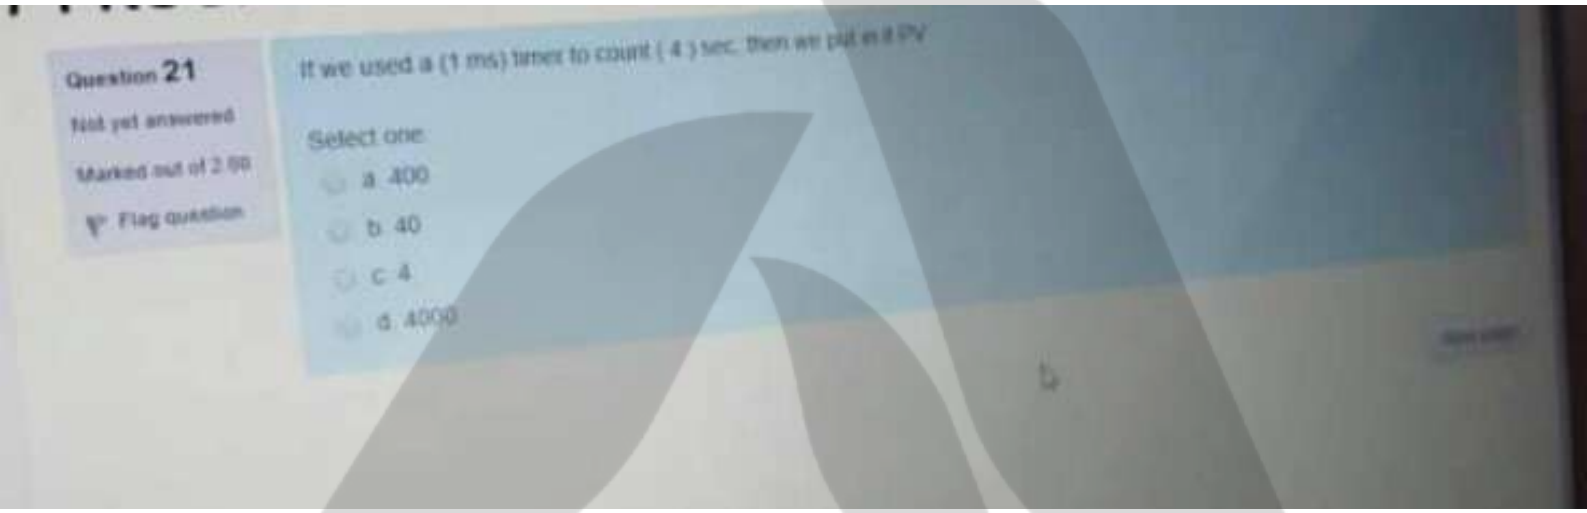

Select one:

a. C + (A + B)D

b. ABC + BD

c. C + D(A + B)

d. C(AB + D)

Question 21
Not yet answered
Marked out of 2.00
Flag question
If we used a (1 ms) timer to count (4) sec. then we put in it PV
Select one:
a. 400
b. 40
c. 4
d. 4000

Question 20

Not yet answered

Marked out of 2.00

Flag question

The PLC Language most used is

Select one:

a. ASCII

b. STL

c. LAD

d. FB

Question 11

Not yet answered

Marked out of 2.00

Flag question

The icon (Compile all) used to

Select one:

a. Select where the error in program

b. To upload program

c. Select the number of error in program

d. Select if the program is correct to the industrial process

Question 19

Not yet answered

Marked out of 2.00

Flag question

We can programming the Microbit (Teach Mover) Robot by

Select one:

a. PC

b. Special Device

c. Micro Win

d. Soft comfort

Question 15

Not yet answered

Marked out of 2.00

Flag question

The S7- 200 PLC have

Select one:

a. 14 Inputs and 10 outputs

b. 10 inputs and 10 outputs

c. 12 Inputs and 8 outputs

d. 8 Inputs and 4 outputs

uestion 5

lot yet answered

Marked out of 2.00

Flag question

Ladder diagram programming consists primarily of

Select one:

a. Text-based code

b. Function blocks with connecting lines

c. Virtual relay contacts and coils

d. Logic gate symbols with connecting lines

Question 6

Not yet answered

Marked out of 2.00

Flag question

One of the following isn't in main PLC components

Select one:

a. Memory

b. I/O device

c. Power Supply

d. Programming device

Question 8

Not yet answered

Marked out of 2.00

Flag question

The Teach Mover System consist of

Select one:

a. 3 Omnidirectional units

b. 6 Stepper motor

c. 6 Omnidirectional units

d. 3 Stepper motor

The S7-200 PLC have

Select one:

- a. 256 counters
- b. not of all
- c. 255 counters
- d. 264 counters

An example of discrete (digital) control is

Select one:

- a. Turning a lamp ON or OFF
- b. Controlling the speed of a fan
- c. Varying the brightness of a lamp
- d. Varying the volume of a music system

The PLC work

Select one:

- a. 1. check input status of the outputs 2. run the program 3. give new orders to the inputs
- b. 1. check input status of the inputs 2. give new orders to the outputs 3. run the program
- c. 1. run the program 2. check input status of the inputs 3. give new orders to the outputs
- d. 1. check input status of the inputs 2. run the program 3. give new orders to the outputs

The maximum value can the timers count time in S7-200 is

Select one:

- a. 327.67 minute
- b. 327.67 sec
- c. 3276.7 sec
- d. 3276.7 minute

Which of the following cannot be an input that is given to the PLC?

Select one:

- a. Relays
- b. Sensors
- c.
  None of the above
- d. switches

If we used a (100 ms) timer to count (8) sec, then we put in it PV

Select one:

- a. 8
- b. 800
- c. 100
- d. 80

(_____)of PLCs can be done in very little time

Select one:

- a. Programming and Installation
- b. Programming
- c. Non of all
- d. Installation

AMMABLE LOGIC CONTRO

For the LAD Network,one of the following isn't correct

Select one:

- a. Starts Rung by one or more contacts
- b. We can repeat the output contacts
- c. The Rung end by coil
- d. We can connect the coil to the power line

The Robotino consist of .....infrared sensor

Select one:

- a. 7
- b. 10
- c. 9
- d. 8

Which of the following cannot be an input that is given to the PLC?

Select one:

- a. switches
- b. None of the above
- c. Sensors
- d. Relays

To run program in S7-200 Simulation we save the program from

Select one:

- a. Save
- b. Save as
- c. Export
- d. Import

The NAND gate have

Select one:

- a. More than one input in parallel
- b. More than one input in series and invert output
- c. More than one input in parallel and invert output
- d. More than one input in series

We can programming the Microbot (Teach Mover) Robot by

Select one:

- a. Soft comfort
- b. PC
- c. Micro Win
- d. Special Device

In a PLC, the scan time refers to the amount of time in which

Select one:

- a. timers and counters are indexed by
- b. the technician enters the program
- c. the entire program takes to execute
- d. one "rung" of ladder logic takes to complete

The NOR gate have

Select one:

- a. More than one input in parallel
- b. More than one input in series
- c. More than one input in series and invert output
- d. More than one input in parallel and invert output

In a PLC, the scan time refers to the amount of time in which .....

Select one:

- a. the technician enters the program
- b. the entire program takes to execute
- c. one "rung" of ladder logic takes to complete
- d. timers and counters are indexed by

We can programming LOGO PLC by:

Select one:

- a. Keys on PLC
- b. From Special programming device
- c. PC
- d. Keys on PLC or from PC

The counter bit turns on when the current value equal zero
The counter is

Select one:

- a. CTU and CTUD
- b. CTD
- c. CTUD
- d. CTU

The Timer Change his contacts, when the input enabling is on

Select one:

- a. TON
- b. TON and TRON
- c. TRON
- d. TOFF

The timer count time when the input contacts is on

Select one:

- a. T Off delay
- b. T ON delay and T OFF delay
- c. T ON delay and TONR
- d. T ON delay

For the LAD Network, one of the following isn't correct

Select one:

- a. Coil connect to the right line
- b. We can repeat the contacts
- c. Contacts connect to right line
- d. We can repeat the coil contacts

To download program from PC to PLC , we don't need

Select one:

- a. Computer
- b. S7-200 Simulator
- c. Micro-Win Program
- d. PC/PPI cable
