FACULTY OF ENGINEERING TECHNOLOGY

Subject: Comm.& Data Transmission Quiz 2(2)

Name: ليث قاسم صفيد عزيز..... Duration: 5 minutes

+5

Question	1	2	3	4	5
Answer	A	A	A	A	A

1. In FSK technique, the process of modulation produces:

a. A nonperiodic analog composite signal b. A periodic analog composite signal

c. A nonperiodic digital composite signal c. A periodic digital composite signal

2. In Amplitude Shift Keying, the result of this process is:

a. modulated signal with varying amplitude b. modulating signal with varying frequency

c. carrier signal with varying frequency c. message signal with varying frequency

3.The bandwidth is greater in the following technique:

a. FSK b. ASK c. PSK d. QAM

4. Quantization levels are more in:

a. video signal b. audio signal c. speech signal d. music signal

5. If the bandwidth of speech signal is 5 KHz , then number of samples is needed equal to:

a. 10000 b. 5000 c. 2 d.4
